

Uptown's beautiful gardens reflect its diverse and vibrant community members. The **Fourth Annual Uptown Garden Walk** focuses on climate change, exploring the relationship between people and our natural environment. Plants and trees provide protection from weather events, and humans have a role in stewarding healthy, resilient green spaces.

Two guided tours will highlight common challenges and best practices in a changing climate, and the self-guided tours highlight community-managed efforts. Join one of the Guided Tours at the times listed below, or Guide Yourself using the map. View the digital tour for garden details.

**LAKE EFFECT TOUR**, 11:00am start at Ginkgo Organic Garden, 4055 N. Kenmore Ave. Learn how Uptown's history and gardens matter in our climate-challenged times. Lake Effect: Gardens and History for Climate-Challenged Times will be led by Melanie Eckner of Uptown Coastal Initiative and Susan Ask of animalia project.

**GARDEN GATHERING**, 12:30pm gathering at Clarendon Park, 4501 N. Clarendon Ave. Mingle with neighbors and garden stewards and enjoy refreshments and mini-workshops.

**TREES OF UPTOWN TOUR**: 1:30pm start at Clarendon Park, 4501 N. Clarendon Ave. Explore the role of trees and how we can care for them in a changing climate. Trees of Uptown will be led by Andrew Lueck of Planned Forest Solutions.
